Amendments to the Claims:

Please cancel Claims 57, 58, 63, 64, 69, and 71 without prejudice or disclaimer of the subject matter presented therein. Please amend Claims 56, 59, 62, 65, 68, and 70, and add new Claims 76-82 as follows. This listing of claims will replace all prior versions and listings of claims in the Application.

1. – 55. (Cancelled)

56. (Currently Amended) A graphic user interface (GUI) for a printer console for controlling the printing of a document having ~~one or more~~ a plurality of pages, wherein each of the ~~one or more~~ plurality of pages has associated therewith ~~more than one~~ a plurality of media and/or finishing attributes, the graphic user interface comprising:

a page representation for each of the ~~more than one~~ plurality of pages, the page representations being miniature representations of particular pages as they will look when they are printed, ~~and~~ wherein the GUI displays more than one page representation simultaneously; and

a media and/or finishing attributes operator interface operatively coupled to ~~each of the one or more pages for viewing and/or~~ a selected group of the plurality of pages and configured to facilitate at least one of viewing of, adding to, ~~deleting or~~ deleting from, and modifying of the media and/or finishing attributes of the ~~one or more~~ selected group of the plurality of pages, wherein the ~~more than one~~ media and/or finishing attributes operator interface ~~for each page may be~~ operatively coupled to the selected group of the plurality of pages is displayed ~~by selecting~~ in response to selections of the page ~~representation~~ representations for ~~that page~~ the selected group of the plurality of pages.

57. – 58. (Cancelled)

59. (Currently Amended) A graphic user interface in accordance with claim 56, further comprising a pointing device, and wherein the media and/or finishing attributes operator interface is displayed when the pointing device is manipulated over one of the selected page ~~representation~~ representations.

2

60. (Previously Presented) A graphic user interface in accordance with claim 56, wherein the media and/or finishing attributes operator interface is comprised of a pull down menu.

61. (Previously Presented) A graphic user interface in accordance with claim 56, wherein the media and/or finishing attributes operator interface is comprised of a dialog box.

62. (Currently Amended) A method of controlling through a graphic user interface _(GUI)_ the printing of a document having ~~one or more~~ _a plurality of_ pages, wherein each of the ~~one or more~~ _plurality of_ pages has associated therewith ~~one or more than one~~ _a plurality of_ media and/or finishing attributes, the method comprising:

representing each of the ~~more than one~~ _plurality of_ pages with a page representation, which is a miniature representation of a particular page as it will look when it is printed, ~~and~~ wherein the GUI displays more than one page representation simultaneously; _and_

~~providing operative coupling to~~ _displaying on the GUI, in response to selections of the page representations of a selected group of the plurality of pages,_ a media and/or finishing attributes operator interface ~~available for each of the one or more pages for viewing and/or~~ _operatively coupled to the selected group of the plurality of pages and configured to facilitate at least one of viewing of,_ adding _to,_ deleting ~~or~~ _from, and_ modifying _of_ the media and/or finishing attributes of the ~~more than one~~ _selected group of the plurality of_ pages ~~by selecting the page representation for the one or more pages~~.

63. – 64. (Cancelled)

65. (Currently Amended) A method in accordance with claim 62, wherein the ~~selecting comprises manipulating~~ _media and/or finishing attributes operator interface is displayed in response to a manipulation of_ a pointing device over _one of_ the selected page ~~representation~~ _representations_.

66. (Previously Presented) A method in accordance with claim 62, wherein the media and/or finishing attributes operator interface is comprised of a pull down menu.

67. (Previously Presented) A method in accordance with claim 62, wherein the media and/or finishing attributes operator interface is comprised of a dialog box.

68. (Currently Amended) A graphic user interface ~~(GUI)~~ for a printer console for controlling the printing of a document having ~~more than one~~ a plurality of pages, wherein each of the ~~more than one~~ plurality of pages has associated therewith ~~more than one~~ a plurality of media and/or finishing attributes, the graphic user interface comprising:

a page representation for each of the ~~more than one~~ plurality of pages, the page representations being miniature representations of particular pages as they will look when they are printed, ~~and~~ wherein the GUI displays more than one page representation simultaneously; and

a media and/or finishing attributes operator interface operatively coupled to ~~each~~ a selected page of the ~~more than one~~ plurality of pages ~~for~~ and configured to facilitate at least one of viewing ~~and/or~~ of, adding to, deleting ~~or~~ from, and modifying of the media and/or finishing attributes of the ~~more than one pages~~ selected page, wherein all of the media and/or finishing attributes associated with ~~a particular~~ the selected page are displayed ~~by selecting~~ in response to a selection of the page representation for ~~that~~ the selected page.

69. (Cancelled)

70. (Currently Amended) A method of controlling through a graphic user interface (GUI) the printing of a document having ~~more than one~~ a plurality of pages, wherein each of the ~~more than one~~ plurality of pages has associated therewith ~~more than one~~ a plurality of media and/or finishing attributes, the method comprising:

representing each of the ~~more than one~~ plurality of pages with a page representation, which is a miniature representation of a particular page as it will look when it is printed, ~~and~~ wherein the GUI displays more than one page representation simultaneously; and

displaying, on the GUI ~~displaying and operatively coupling to~~ and in response to a selection of a selected page representation of the page representations, all of the media and/or finishing attributes ~~available for each of the more than one pages by selecting the page representation for the more than one pages~~ associated with the page represented by the selected page representation.

71. (Cancelled)

72. (Previously Presented) A graphic user interface in accordance with claim 56, wherein the GUI detects conflicts between media and/or finishing attributes and media and/or finishing attributes which are improperly set.

73. (Previously Presented) A method in accordance with claim 62, further comprising the step of detecting conflicts between media and/or finishing attributes and media and/or finishing attributes which are improperly set.

74. (Previously Presented) A graphic user interface in accordance with claim 68, wherein the GUI detects conflicts between media and/or finishing attributes and media and/or finishing attributes which are improperly set.

75. (Previously Presented) A method in accordance with claim 70, further comprising the step of detecting conflicts between media and/or finishing attributes and media and/or finishing attributes which are improperly set.

76. (New) The graphic user interface of Claim 56, wherein the media and/or finishing attributes operator interface facilitates viewing of, adding to, and deleting from the media and/or finishing attributes of the selected group of the plurality of pages.

77. (New) The graphic user interface of Claim 56, wherein the media and/or finishing attributes operator interface facilitates viewing of, adding to, deleting from, and modifying of the media and/or finishing attributes of the selected group of the plurality of pages.

78. (New) The graphic user interface of Claim 56, wherein the selected group of the plurality of pages includes all of the plurality of pages.

79. (New) The method of Claim 62, wherein the media and/or finishing attributes operator interface facilitates viewing of, adding to, and deleting from the media and/or finishing attributes of the selected group of the plurality of pages.

80. (New) The method of Claim 62, wherein the media and/or finishing attributes operator interface facilitates viewing of, adding to, deleting from, and modifying of the media and/or finishing attributes of the selected group of the plurality of pages.

81. (New) The method of Claim 62, wherein the selected group of the plurality of pages includes all of the plurality of pages.

82. (New) The graphic user interface of Claim 68, wherein the media and/or finishing attributes operator interface is operatively coupled to a plurality of selected pages of the plurality of pages and is configured to facilitate at least one of viewing of, adding to, deleting from, and modifying of the media and/or finishing attributes of the plurality of selected pages.
